Career Objective

Second-year Software Engineering student at Universiti Teknologi Malaysia with knowledge of programming fundamentals, data structures and algorithms, UI design, and web development through academic and project-based learning. Seeking a two-month Voluntary Industrial Training placement commencing from 1 August 2026 to apply technical skills and contribute to real-world software development projects.

Education

Universiti Teknologi Malaysia (UTM), Kuala Lumpur

Bachelor of Software Engineering with Honours - Malaysia-Japan International Institute of Technology (MJIIT)

CGPA: 3.13/4.00 - Expected Graduation: 2028

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Engineering, Advanced Programming, Software Design & Architecture, Cross-Platform Application Development, Application Development Project I

Projects

Intelligent FYP Assessment Management System (I-FAMOUS) | UTM | Vue.js, TailwindCSS, Node.js, Express.js, MySQL

- Developed responsive portals for 4 user roles (students, coordinators, examiners, supervisors) improving project milestone tracking and submission management.
- Implemented JWT authentication and role-based access control for secure examiner access.
- Designed submission/revision workflows with annotated feedback and resubmission triggers.

Library Duty Management System | UTM | Vue.js, Node.js, Express.js, MySQL, Postman

- Developed a scheduling system that automated fair duty assignment for over 100 junior and senior students.
- Implemented teacher dashboard functions (auto-assign, edit, reset, publish) to streamline workflows.
- Tested and validated 20+ API endpoints using Postman, identifying and resolving backend integration issues.

UniSpace – University Study Room Booking System | UTM | Vue.js, Pinia, PHP, MySQL

- Centralized state management with Pinia to synchronize reservations across components.
- Integrated local storage persistence to maintain booking continuity across sessions.
- Designed ERD and system architecture covering rooms, bookings, notifications, and audit logs.

Free Space Management Simulation | Operating Systems Project | C++

- Developed disk free-space simulator comparing Bitmap and Linked List allocation techniques.
- Applied First-Fit allocation strategy and stress-tested with ride-hailing server workloads.
- Analyzed fragmentation handling, scalability, and efficiency trade-offs.

Technical Skills

Languages: C++, Java, Python, JavaScript, HTML, CSS

Frameworks: Vue.js, Node.js, Express.js, TailwindCSS

Databases: MySQL, TiDB

Tools: Git, GitHub, JIRA, Azure DevOps, Postman, VS Code, Laragon, Alteryx, Tableau

Modeling: UML, ERD, Requirements Analysis, Responsive UI Design, Figma, Canva

Languages

- English (Advanced)

Certifications

- Alteryx Designer Core Certified (2026)
- Enhancing Thesis Mastery - UTM (2026)
- British Council English Course Completion (2023)

Awards & Achievements

- MJIIT Dean’s List Award - Semester 1, 2025/2026
- IELTS Academic - Band 7.0 (CEFR C1)

Co-Curricular Activities

- Participated in AIESEC Johor Bahru Summer Youth Survey (2026)
- Attended Agile Project Management Lecture Series (2026)
- Attended Research Paper Writing Talk (2026)
- Attended Internship Talk – Campus to Corporate (2025)
